SUMMARY

Results-oriented Engineering student with a proven track record of optimizing project outcomes. Skilled in interactive web development and team leadership. Seeking a challenging development role to leverage technical expertise and drive engineering excellence.

WORK EXPERIENCE

React.js Intern , Appstick Khulna.

September 2023 - October, 2023

- Developed responsive and interactive UI components for web applications using React and Tailwind CSS, enhancing the user experience.
- Collaborated with senior developers to implement front-end features, ensuring smooth integration with back-end services.
- Optimized web pages for speed and responsiveness, improving performance across multiple devices.
- Gained practical experience in version control using Git, participating in team code reviews and collaborative project management.
- Learned industry best practices in web development and user interface design, contributing to the team's overall efficiency and product quality.

PROJECTS

1. Quizzzz (Quiz App)

August, 2023 - September, 2023

Technology Stack: MERN

- A quiz application using MERN Stack (Mongo DB, Express, React, and Node.js) with different game levels and two user roles: User and Admin.
- Users can register, log in, and participate in quizzes across multiple categories and game levels, providing a dynamic and engaging experience.
- Admin users have full control over the platform including the ability to create, edit and delete quiz categories, questions and user accounts.
- Designed a user-friendly interface using tailwind CSS, ensuring smooth navigation and interactive experience.

2. Dm Me (Chat App)	November, 2024 - December, 2024
Technology Stack: MERN	
<ul style="list-style-type: none"> • Developed a real-time chatting application using the MERN stack (MongoDB, Express, React, Node.js) and Socket.io for seamless communication between users. • Implemented user registration and authentication functionality, ensuring secure user sign-ups and logins with password hashing. • Designed an intuitive profile management system, allowing users to edit their profile information and upload a custom avatar. • Integrated a dynamic theme customization feature, enabling users to change the appearance of the app to suit their preferences. • Utilized MongoDB to store user data and chat history, ensuring smooth performance and efficient data retrieval. 	

3. Car Rent (Car Renting Website)	September, 2023 - September, 2023
Technology Stack: Next.js, Tailwind CSS	
<ul style="list-style-type: none"> • A front-end car renting website using Next.js, providing a smooth and responsive user experience for browsing and renting cars. • Integrated various car categories and cars which are dynamically fetched from a custom-built API. • Implemented user registration and login functionality with data securely stored in localStorage for a seamless experience across sessions. • Users can browse and select cars based on their preferred category, view car details, and rent their chosen vehicle directly through the platform. 	

EDUCATION	
<hr/>	
Northern University of Business and Technology,	March, 2020 - November, 2024
<i>Bachelor of Science in Computer Science and Engineering</i>	Khulna, Bangladesh
CGPA: 3.70/4.00	
Islamabad Collegiate School and College,	April, 2017 - July, 2019
<i>Higher Secondary Education, Science</i>	Khulna, Bangladesh
CGPA: 4.17/5.00	

SKILLS

React.js

Tailwind CSS

Next.js

JavaScript

Python

Microsoft Word

Microsoft PowerPoint

Microsoft Excel

CERTIFICATES

JavaScript for Beginners,

Skillup by Simplilearn

November, 2024

IT Support for Office Management,

EDGE, Khulna University

~

LANGUAGES

- English
- Bangla
